# QUALITY PRODUCTS FROM ORGANICS

Van Schaik's Bio Gro is a well-established family owned Australian business in the organic recovery industry.

Our mantra of **Recover, Refine, and Reapply** represents our sustainable approach to processing and delivering a continuous quantity of high quality composts and mulches for use on farms.

Bio Gro has three facilities for the recovery and processing of organic material. Two in Victoria; Dandenong South and Newbridge and the third in Wandilo, Mount Gambier, South Australia.

**Our Mission is to lead the way in providing sustainable ecological soil health solutions and environmental visions, for the positive impact on our green world for future generations.**

We specialise in developing, manufacturing, and marketing a diverse range of well developed, tried and tested and highly reliable mulching mediums, organic composts, soil conditioners and liquid growth stimulants engineered to meet the standards of the viticultural and broad acre industries.

To further improve our market position within the extensive agricultural and viticultural markets, we have a highly skilled team of experts to explore product development opportunities that will satisfy existing and unarticulated needs. This will enable us to improve the health of soils with long term sustainable outcomes.

A family  
owned  
Australian  
business

**Bio Gro has an extensive transport fleet of vehicles** in South Australia and Victoria to ensure that our customers' products get there when needed. Our range of vehicles includes B-Double tippers, truck and dog tippers, walking floor trailers, or tautliners.

**No matter what product and profile you are looking for, we can find the right logistics solution to meet your needs.**

Bio Gro is accredited with **Australian Standards (Certified Products), NIASA (the peak body of the Australian nursery industry), and NASAA, (Organic accreditation).**

These accreditations govern what we do and how we do it.

They outline the processes we follow to produce quality products and services day in and day out.

We welcome the opportunity to assist you with information related to adding organic carbon to your land. See how we can help you today. Call **1800 BIO GRO (246 476)** or visit [biogro.com.au](http://biogro.com.au) for further information.
